Description

YorkShield Vinyl has been designed with a rigid sheet of polyvinyl chloride that can be formed on site by hand. **YorkShield Vinyl** is UV resistant and a great surface for sealants and adhesives to adhere to.

Compatible With

- Air barriers
- Deck materials
- Roofing membranes
- Construction sealants and adhesives

Joining of Material

Joint shall be made by lapping a minimum of 6" and coating the contacting surfaces with a construction adhesive or sealant, like York's **UniverSeal US-100**.

Uses

- Deck & ledger board flashing
- Head flashing for doors & windows
- Sill pans for doors & windows
- Soffits & fascia boards
- Termite shield
- Shower pans
